DETAILED ACTION

Response to Amendment

1. This Office Action is responsive to the Amendment filed 1/22/08.
2. The Amendment filed 1/22/08 successfully overcomes the rejections set forth in paragraphs 3-5 of the Office Action mailed 8/22/07. Accordingly, these rejections are withdrawn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000-089233 (JP '233) in view of JP 7-181316 [cited in the Information Disclosure Statement filed 4/19/04] (JP '316) for the reasons of record as set forth in paragraph 6 of the Office Action mailed 8/22/07, and as further discussed below.

Allowable Subject Matter

4. Claims 1-15 and 34-36 are allowed.

5. Claim 38 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 1/22/08 have been fully considered but they are not persuasive. With respect to new claim 37, Applicant argues that the applied prior art fails to disclose or suggest forming the opening in the color filter layer and a black matrix layer on the substrate as the first, second and third sub color filter are formed by sequentially masking and etching a respective one of a first, second and third sub color filter layers. However, JP '233 exemplifies forming the opening at the time of applying, exposing and developing layers of black, green, red and blue resists (see paragraphs [0026] and [0027] of the computer-generated translation). While this example discloses forming the opening in the black photopolymer layer, JP '233 also teaches that the opening may alternatively be formed in a colored layer (see the abstracts, and paragraphs [0016]-[0018] of the computer-generated translation). JP '316 teaches providing light shielding parts (i.e. a black matrix) by forming a red transparent coloring layer, a green transparent coloring layer, and a blue transparent coloring layer respectively in order so that part of them overlap, and providing a transparent resin layer (i.e. overcoat layer) over the resulting color filter.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
